

Add share feature + merge bandwidth caching fixes

New: students can share any chapter/topic/folder with a friend via

WhatsApp/SMS/etc, with an invite to install the app

- Includes the bank caching fix (only re-downloads the question bank when it actually changes, instead of every app open)
- Includes the cache-hardening fix (never trusts a local cache that failed to save fully, so new folders/content never appear empty on devices where the bank is too large for browser storage)
